Engineered to Impress

# ENGINEERED TO IMPRESS

With 20 years of successful performance, it's easy to see why the LP® SmartSide® brand is one of the fastest-growing brands of siding materials in the U.S.

## A Pioneer of Change

LP has redefined traditional building materials with treated engineered wood products that are designed to offer game-changing durability, beauty and workability. LP is a building industry leader in a category that is shaping the way homes, outdoor building structures and light commercial properties are being built.

See the innovation that goes into making LP SmartSide products at [youtube.com/lpsmartside](https://youtube.com/lpsmartside).

# BECAUSE STRENGTH IS MAKE OR BREAK

## A Natural Defense Against Nature

All LP® SmartSide® products are treated to the core through our proprietary SmartGuard® process. With four components of protection, the SmartGuard process adds strength and helps LP SmartSide products withstand impacts, freeze-thaw cycles, high humidity, fungal decay and more. See more about how LP SmartSide is made at [youtube.com/lpsmartside](https://www.youtube.com/lpsmartside).

LP SmartSide

Fiber Cement

Vinyl

LP SmartSide product testing in Hilo, Hawaii

Untreated wood (left), LP SmartSide (right)

## Outstanding Impact Resistance

Testing shows that LP SmartSide strand substrate products resist impact better than vinyl and fiber cement siding, which means they can stand up better against everything from everyday bumps to airborne storm debris. And because it doesn't break as easily as fiber cement siding, LP SmartSide strand siding is also easier to handle and install, and results in less waste.

## Hail and Wind Resistance

Third-party test results demonstrate that LP SmartSide lap siding resisted hail damage better than fiber cement and vinyl. In fact, the LP SmartSide warranty covers impacts from hail up to 1.75" in diameter. LP SmartSide lap siding is also designed to withstand tough storms with wind gusts of up to 200 miles per hour. Refer to ESR-1301, Table 2B, Lap Siding.

## Resistance to Fungal Decay and Termites

Since 1996, LP SmartSide strand substrate siding has undergone brutal testing in Hilo, Hawaii. An average temperature of more than 70 degrees, high levels of humidity and almost 170 inches of annual rainfall make Hilo's climate the perfect breeding ground for termites, moisture and fungal decay. Yet our Exterior Exposure Program continues to validate that LP SmartSide siding performs over time.

## A Strong Warranty Behind It

LP has your back with an industry-leading, transferable, limited warranty:

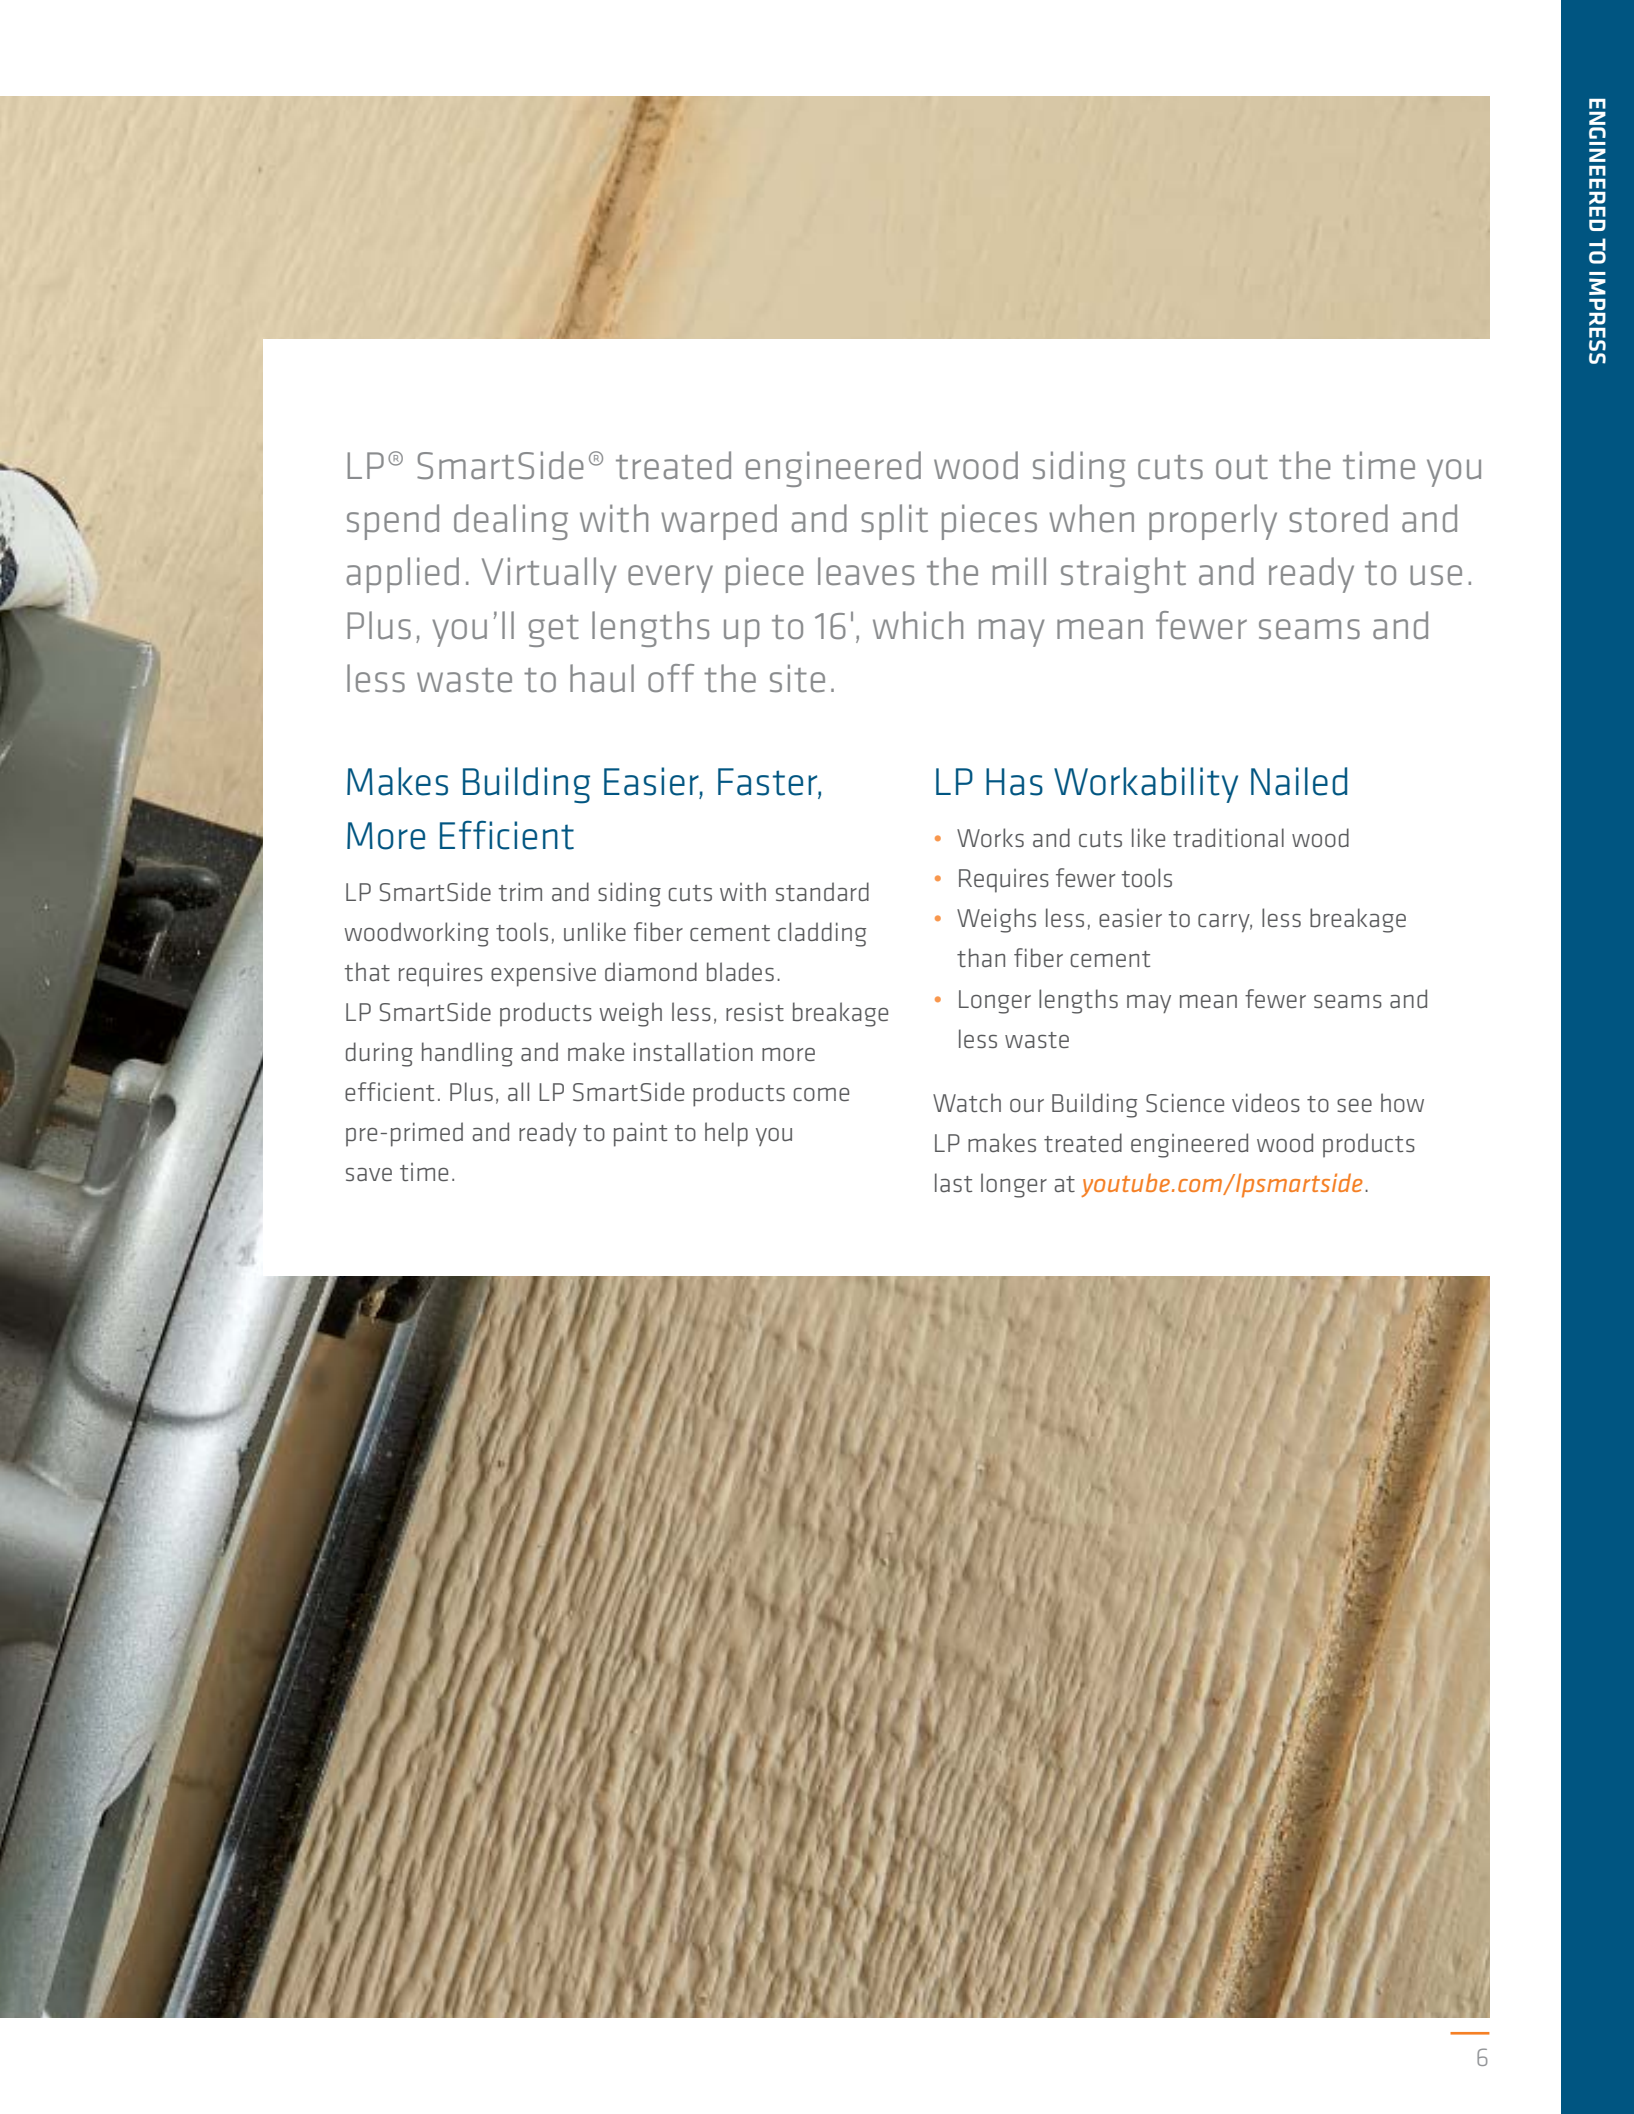

A 50-year pro-rated Limited Warranty with a 5-year 100% labor and material replacement warranty

\*For complete warranty details visit [lpcorp.com](http://lpcorp.com)

**WORKS  
THE WAY  
WOOD IS  
SUPPOSED  
TO**

LP® SmartSide® treated engineered wood siding cuts out the time you spend dealing with warped and split pieces when properly stored and applied. Virtually every piece leaves the mill straight and ready to use. Plus, you'll get lengths up to 16', which may mean fewer seams and less waste to haul off the site.

### Makes Building Easier, Faster, More Efficient

LP SmartSide trim and siding cuts with standard woodworking tools, unlike fiber cement cladding that requires expensive diamond blades.

LP SmartSide products weigh less, resist breakage during handling and make installation more efficient. Plus, all LP SmartSide products come pre-primed and ready to paint to help you save time.

### LP Has Workability Nailed

- Works and cuts like traditional wood
- Requires fewer tools
- Weighs less, easier to carry, less breakage than fiber cement
- Longer lengths may mean fewer seams and less waste

Watch our Building Science videos to see how LP makes treated engineered wood products last longer at [youtube.com/lpsmartside](https://www.youtube.com/lpsmartside).

# GROW WITH US

## A Smart Choice for Our Planet

LP® SmartSide® Trim and Siding are must-have materials to help builders qualify for green building programs. Plus, many homeowners and building owners are demanding sustainable products that have minimal impact on our environment.

We're not just building for the future; we're helping to protect it by using Sustainable Forestry Initiative® (SFI) certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests.

### Naturally Sustainable

The LP SmartSide manufacturing process begins with wood, a renewable resource, grown and gathered under strict SFI standards. We target fast-growing trees and use 99% of the log for either the product or the fuel to make it. Plus, all binding agents and resins are low-emitting.

### Responsibly Made With Wood

- Responsibly made with a renewable resource – wood
- 99% of the log is used
- Qualifies for green building programs

Learn more about LP's environmental programs at [LPCorp.com](https://www.lpcorp.com).

# STAND OUT WITH YOUR OWN CUSTOM LOOK

## Picture It Beautiful

LP® SmartSide® products offer homeowners the bold look of their signature cedar-grain texture in profiles that are always in style. It's been the siding of choice for 20 years for homeowners who want uncompromising quality and distinctive curb appeal.

Choose your style. Choose your colors. Get the look you want. That's the beauty of working with treated engineered wood trim and siding. LP SmartSide products offer you the versatility to achieve stunning results with ease. Whether you're building a traditional craftsman or a modern masterpiece, LP SmartSide products are a beautiful choice.

**THE  
BEAUTIFUL  
DIFFERENCE  
BETWEEN**

**FIBER AND  
STRAND  
PRODUCTS**

LP® SmartSide® products are available in two similar types of engineered wood substrates to achieve distinctly different looks.

Both strand and fiber substrates incorporate our proprietary SmartGuard® process to enhance strength and offer protection against termites and fungal decay. However, strand substrates are better suited to create deep wood-grain textures, and fiber substrates are ideal for smooth finishes.

### Strand Substrate

- Treated with the SmartGuard process
- Best substrate for deep cedar-grain texture
- Excellent resistance to warping, splitting and cupping
- Offers superior impact resistance
- LP's 5/50 year limited warranty\*

### Fiber Substrate

- Treated with the SmartGuard process
- Best substrate for a smooth finish
- Excellent resistance to warping, splitting and cupping
- Superb design versatility
- LP's 5/50 year limited warranty\*

# GET THE TIMELESS LOOK OF WOOD LAP

# Traditional, Bold, Subtle, Daring, Modern

Create the look you want with a versatile selection of LP® SmartSide® products. Engineered to stand up to extreme weather, LP SmartSide Lap Siding is a natural, durable choice for structures in any region. Plus, it's the perfect companion cladding for structures partially finished in stucco, stone and brick.

# THE DETAILS BRING OUT THE BEAUTY

## Outline Your Vision

LP® SmartSide® Trim & Fascia are the finishing touch that's the first to get noticed. With its smooth finish or deep cedar-grain texture and variety of widths and thicknesses, you can add custom design accents that take curb appeal to the next level. LP SmartSide Trim is a must-have product for when you want your craftsmanship to stand out on any home, shed or light commercial building.

Reversible Trim

# GET THE RIGHT LOOK FROM EVERY ANGLE

# An Innovative Alternative to MDO, Plywood, Vinyl or Metal Vents

When you use LP® SmartSide® Soffit on your projects, people will notice your attention to every detail. You'll get the same wood grain or smooth look that matches other LP SmartSide products in a soffit that's pre-cut to the width you need. Vented soffits are also available with precisely cut, bug-resistant vents.

# MORE THAN A SHED

## Outdoor Building Solutions®

LP® Outdoor Building Solutions® engineered wood products feature innovations that help offer more value to customers. With innovations like SilverTech® panel for a brighter and cooler interior and SmartFinish® overlay for a tough, attractive appearance, LP Outdoor Building Solutions products give you quality you can see inside and out.

[LPShed.com](http://LPShed.com)

## Popular Choices for Outdoor Buildings:

- LP® SmartSide® Panel Siding
- LP SmartSide Panel Siding with SilverTech
- LP SmartSide Panel Siding with SmartFinish
- LP SmartSide Lap Siding
- LP ProStruct® Flooring with SmartFinish
- LP ProStruct Roof with SilverTech
- LP SmartSide Trim and Fascia

# PRO-GRADE DURABILITY & BEAUTY

## Light Commercial

Light commercial buildings put any exterior cladding to the test, but few can withstand the increased demands and come out looking as beautiful as LP® SmartSide® products. LP SmartSide Panel and Lap Siding are fast becoming a popular choice for building owners who want the extraordinary curb appeal of wood-grain texture. It's a welcome alternative to metal cladding that's making the light commercial landscape more beautiful every day.

# TAKE A CLOSER LOOK

## Get the Details on Each Product

LP® SmartSide® products come in different lengths, widths, textures, profiles and substrates, so there's an ideal product for virtually any set of needs. Each option has its own unique combination of advantages. Find all those details and product specifications here.

# Specifications: LP® SmartSide® Lap Siding

## Cedar Texture Lap

### The Bold Look of Cedar Without Many of the Worries

- One of the most durable lap siding options in the market today
- 16' length can result in faster installation
- May create fewer seams than traditional 12' siding
- Pre-primed for exceptional paint adhesion
- Self-aligning SmartLock™ option installs faster and more efficiently
- Treated engineered wood strand substrate
- APA-certified lap siding

Also available in fiber substrate.

- CPA-certified lap siding
- Treated engineered wood fiber substrate

# Cedar Texture Panel

Rated for Structural Use by APA®

- Shiplap edges with advanced bead system for easier alignment
- Pre-primed for exceptional paint adhesion
- Significantly lighter than comparable fiber cement panel
- Strong enough to be nailed directly to stud, making additional sheathing unnecessary in many applications
- Eliminates need for additional bracing on load-bearing walls
- Ideal exterior for homes in areas of high winds or seismic activity
- Treated engineered wood strand substrate

Also available in fiber substrate.

- Not rated for structural use
- Treated engineered wood fiber substrate

# Stucco Texture Panel

## The Rich Look of Stucco Made Easier

- The remarkably detailed soft, earthy, hand-troweled effect of stucco on a panel
- Deeply textured and varied from board to board
- Comes in easy-to-install shiplap edge panels
- Available pre-primed
- Not rated for structural use
- Treated engineered wood fiber substrate

Stucco texture

### Stucco Texture Panel (fiber)

DESCRIPTION	LENGTH	ACTUAL WIDTH	MINIMUM THICKNESS	PID NUMBER
Stucco Texture Panel (fiber)	8 ft. (96 in.)(2.4 m)	48.56 in. (123.4 cm)	0.375 in. (10 mm)	25912
	9 ft. (108 in.)(2.7 m)	48.56 in. (123.4 cm)	0.375 in. (10 mm)	25913

# Smooth Finish Panel

## Designed for Ease and Performance

- The shiplap edge makes it easier to install
- Pre-primed for exceptional paint adhesion
- Not rated for structural use
- Smooth finish
- Treated engineered wood fiber substrate

Smooth finish

# Reverse Board & Batten

## The Resilient Spirit of Historic Architecture

- Rustic and cross-sawn texture, this panel features the weathered grain appearance of cedar
- Available in 8' and 9' lengths
- Shiplap edges make it easier to level and apply
- Pre-primed for exceptional paint adhesion
- Not rated for structural use
- Treated engineered wood fiber substrate

# Vertical Siding

## Charming Style for American Homes

- Recreates the stylish appearance of board and batten
- 16' lengths eliminate horizontal joints
- Coordinates with LP SmartSide Trim – 2.5" wide minimum
- Pre-primed for exceptional paint adhesion
- Not rated for structural use
- Treated engineered wood strand substrate

### Vertical Siding

DESCRIPTION	LENGTH	GROOVE	GROOVE WIDTH	ACTUAL WIDTH	MINIMUM THICKNESS	PID NUMBER
38 Series Cedar Texture Vertical Siding - No Groove (strand)	16 ft. (192 in.)(4.9 m)	No Groove	N/A	15.94 in. (40.5 cm)	0.315 in. (8 mm)	40503

# Cedar Texture Trim

## The Classic Appearance of Cedar

- Interior or exterior use, including corner boards, windows and doors
- Narrow widths save cutting time
- Pre-primed for exceptional paint adhesion
- 16' length can result in faster installation and fewer seams
- Treated engineered wood strand substrate

# Reversible Trim

## Two Great Looks in One

- The natural look of cedar texture on one side and smooth finish on the other
- Interior or exterior use, including corner boards, windows and doors
- Pre-primed for exceptional paint adhesion
- 16' length can result in faster installation and fewer seams
- Treated engineered wood fiber substrate
- Reversible trim has a 1/8" bevel cut on its cedar texture side and is square cut on the smooth finish side

# Cedar Texture Soffit

## The Finishing Touch

- The perfect alternative to MDO and plywood soffits
- Cut-to-width eliminates time spent ripping full sheets
- 38 Series engineered for closed soffit applications
- The 76 Series and 190 Series are ideal for use as the starter course for roofs with exposed eaves
- Treated engineered wood strand substrate

Also available in fiber substrate.

- Not rated for exposed eave applications
- Engineered for closed soffit applications
- Treated engineered wood fiber substrate

# Vented Soffit

## Engineered to Cut Out Problems

- The perfect alternative to MDO, plywood or hand-installed metal vents
- Precisely cut vents offer 10 square inches of ventilation per linear foot, making it easier to meet code requirements while adding architectural beauty
- Designed to minimize paint buildup and promote continuous airflow
- 1/8" vents to help keep hornets and bees out
- Eliminates time spent ripping full sheets
- Treated engineered wood strand substrate

# START STRONG WITH LP BUILDING PRODUCTS

## Inventing a Better Tomorrow with LP

LP's mission is to engineer extraordinary solutions for everyday problems. With a united spirit of discovery, LP is forging ahead with innovative ideas to create new products that offer exceptional performance for today's building challenges.

## LP® ArmorStrand® Panel Substrate Under Textured Finish Coatings

LP ArmorStrand substrate is engineered to deliver a strong foundation to help create the look of stucco with durable acrylic finishes. It's toughness you can build on with confidence.

## LP® FlameBlock® Fire-Rated OSB Sheathing

LP FlameBlock Fire-Rated OSB Sheathing has structural design values equal to standard sheathing in the same performance category. ICC-certified (ESR-1365) per AC264 with a Class A and 30-minute Flame Spread Rating (ASTM E84), it combines fire resistance and impressive structural performance in a single panel.

## LP® TechShield® Radiant Barrier Sheathing

The original, #1 brand of radiant barrier sheathing, LP TechShield Radiant Barrier Sheathing may reduce monthly cooling costs by blocking up to 97% of the radiant heat in the panel from emitting into a home's attic, lowering attic temperatures by up to 30° F.

## LP Legacy™ Super Tough, Moisture-Resistant Sub-Flooring

New LP Legacy sub-flooring uses Gorilla Glue Technology™ for the industry's strongest, stiffest sub-floors. The resin in Gorilla Glue Technology binds wood fibers at the molecular level for premium performance.
